Re: Sandusky County
Whirlpool
Ind. Waste

Dr. William J. Roswell
Health Commissioner
Courthouse
Fremont, Ohio

Dear Dr. Roswell:

Analysis results of the industrial waste sample taken
some time ago from the Galembrowski property have been
received. The elements and amount are as follows:

Copper	0.2	mg/g
Iron	24.4	mg/g
Nickel	2.0	mg/g
Manganese	2.0	mg/g
Lead	0.8	mg/g
Chromium	0.2	mg/g
Zinc	3.6	mg/g

These are the major constituents; their effect on
trees is not known by myself. The lab also indicated that
they do not do organics, therefore if there were any they
are not shown.

Yours truly,

Dan T. Redman
District Sanitary Engineer
